Osprey FL 34299-8863

Dear Dr. Lin:

I am very enthusiastic to learn about your innovation O2ACE-Sys wound treatment system. This system certainly would be applicable to a large number of patients who would benefit from this kind of device. To my understanding, this system actually combines the technology of negative pressure wound therapy (NPWT) as well as oxygen delivery system along with other possible wound care treatment modalities that can be catered to specific needs of the wound itself.

As we all know, the wound care market in the United States has continued to grow in it's development as well as use to provide better care as well as improve in the outcome. With this growing need in the development of wound technology, I'm convinced that O2ACE will be able to deliver a comprehensive range of treatments and provide a more rapid recovery than the chronic wound care system. Overall this will translate into savings of the healthcare system.

I certainly look forward to be working with you in the development of this system.

Sincerely yours,
